### **DATASHEET - NZMB1-4-A125**

Circuit-breaker, 4p, 125A

Part no. NZMB1-4-A125 Catalog No. 265809

EL-Nummer (Norway)

4358820

**Delivery program** 

| Product range                               |                      |    | Circuit-breaker   |
|---|----------------------|----|---|
| Protective function                         |                      |    | System and cable protection   |
| Standard/Approval                           |                      |    | IEC   |
| Installation type                           |                      |    | Fixed   |
| Release system                              |                      |    | Thermomagnetic release  |
| Construction size                           |                      |    | NZM1  |
| Description                                 |                      |    | Set value in neutral conductor is synchronous with set value Ir of main pole. |
| Number of poles                             |                      |    | 4 pole  |
| Standard equipment                          |                      |    | Box terminal  |
| Switching capacity                          |                      |    |   |
| 400/415 V 50 Hz                             | I <sub>cu</sub>      | kA | 25  |
| Rated current = rated uninterrupted current |                      |    |   |
| Rated current = rated uninterrupted current | $I_n = I_u$          | Α  | 125   |
| Neutral conductor                           | % of phase conductor | %  | 100   |
| Setting range                               |                      |    |   |
| Overload trip                               |                      |    |   |
| 中   | l <sub>r</sub>       | A  | 100 - 125   |
| Main pole                                   | I <sub>r</sub>       | Α  | 100 - 125   |

## **Technical data**

Short-circuit releases

# Design verification as per IEC/EN 61439

| Technical data for decign varification  |                  |    |  |
|---|------------------|----|--|
| Technical data for design verification  |                  |    |  |
| Rated operational current for specified heat dissipation  | In               | Α  | 125  |
| Equipment heat dissipation, current-dependent   | $P_{\text{vid}}$ | W  | 26.72  |
| Operating ambient temperature min.  |                  | °C | -25  |
| Operating ambient temperature max.  |                  | °C | 70   |
| IEC/EN 61439 design verification  |                  |    |  |
| 10.2 Strength of materials and parts  |                  |    |  |
| 10.2.2 Corrosion resistance   |                  |    | Meets the product standard's requirements.                         |
| 10.2.3.1 Verification of thermal stability of enclosures  |                  |    | Meets the product standard's requirements.                         |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat  |                  |    | Meets the product standard's requirements.                         |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects $$ |                  |    | Meets the product standard's requirements.                         |
| 10.2.4 Resistance to ultra-violet (UV) radiation  |                  |    | Meets the product standard's requirements.                         |
| 10.2.5 Lifting  |                  |    | Does not apply, since the entire switchgear needs to be evaluated. |
|   |                  |    |  |

| 10.2.6 Mechanical impact                                 | Does not apply, since the entire switchgear needs to be evaluated.   |
|--|--|
| 10.2.7 Inscriptions                                      | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES                  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances                   | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock                   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections        | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors                 | Is the panel builder's responsibility.   |
| 10.9 Insulation properties                               |  |
| 10.9.2 Power-frequency electric strength                 | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage                         | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material | Is the panel builder's responsibility.   |
| 10.10 Temperature rise                                   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
